

VIJAY KARTHI

Software Engineering Graduate | Full-Stack Developer

Bangalore, India | +91 9902360383 | Vijaykarthi.gopi@gmail.com | github.com/vijay-karthi

PROFESSIONAL SUMMARY

Computer Science and Statistics graduate with hands-on experience building full-stack web applications using React, Python, and Java. Strong foundation in data structures and algorithms (50+ problems solved), object-oriented programming, databases, and REST APIs. Completed a cybersecurity internship applying secure software and testing practices. Seeking to contribute as a Software Application Development Apprentice.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Web Development: React, HTML5, CSS3, REST APIs

Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Software Testing

Tools: Git, GitHub, VS Code

PROJECTS

Image Steganography (LSB Method) | Python

- Built an application implementing the Least Significant Bit (LSB) technique to encode and decode hidden text within image files, preserving visual image quality while embedding data imperceptibly.
- Handled pixel-level bit manipulation and image I/O to embed and recover data without visible distortion.

Stock Market Analysis Tool | Python, pandas, NumPy, yfinance

- Built a Python application that pulls historical stock data via the yfinance API and uses pandas/NumPy to process, analyze, and visualize market trends.

AI-Powered Mock Interview & Aptitude Platform | React, Claude API

- Built two React web apps — an aptitude test and a technical interview simulator — that call the Claude API to evaluate user responses and generate real-time performance feedback.
- Designed reusable React components and managed dynamic question flows and scoring logic.

EXPERIENCE

Cybersecurity Intern | Edunet Foundation

- Completed hands-on training in cybersecurity fundamentals, covering networking, secure software practices, and threat awareness.
- Strengthened analytical and problem-solving skills through practical, real-world assignments.

EDUCATION

B.Sc. Computer Science and Statistics 2023 – 2026

Kristu Jayanti College, Bangalore

Relevant Coursework: Data Structures, DBMS, Probability & Statistics, Statistical Inference, Programming

CERTIFICATIONS

- Cybersecurity Certification — Credly
- Software Testing Certification — ICT Infotech
